D1 Series Smart Panel

The D1 Deconstruction series switch balances complexity and simplicity. Inspired by the Soviet Constructivism style, it breaks down and scatters its overall integrity to create an asymmetrical but proportionally harmonious form. This coincides with the popular deconstruction of the 20th century and is named ‘Deconstruction’ in tribute to it. It cleverly uses white space, various materials and colors, to make the panel and space achieve a seamless harmony of function and aesthetics.
The wireless remote scene switch is battery powered and no wiring required. It has a built–in magnet that can be attached to ferrous metal surfaces (such as refrigerators, iron cabinets, etc.), or it can use a magnetic backplate to attach the switch to glass, wood veneer, wall surfaces and other media surfaces.
The knob design can be used as a control panel for a single scene, such as controlling the brightness, color temperature and color of lights in different zones. This eliminates the cumbersome experience of using a mobile phone to control it and makes interaction more intuitive.

D1 Remote Control

Flexibility

D1 wireless scene controller is an easy–to–use product, which is battery–powered. Users can easily control smart devices under the same gateway by setting scenes. The controller can be placed on the wall or bedside through its magnetic backplate, or it can be placed directly on iron materials such as refrigerators and iron cabinets.

Highly customizable

The D1 remote gives direct access to all the important Casambi lighting control functionalities. The preset buttons of D1 remote can be configured via the Casambi App.

Color

Champagne gold/PC

Dark gray/PC

Snowy white/PC

Starlight gold/AL

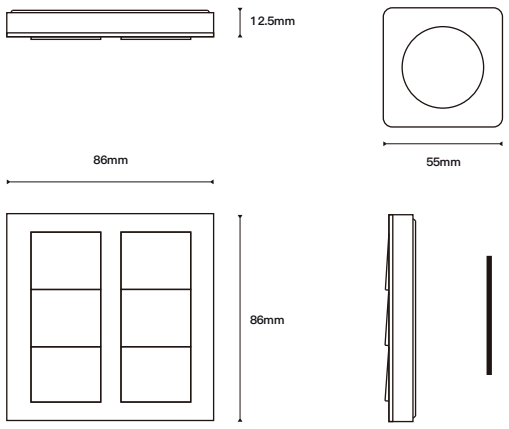
Space grey/AL

Forest green/AL

Burgundy red/AL

Technical parameter

Product size	86 x 86x12mm
Package size	100 x 100 x 60 mm
Weight	0.1 kg
Installation mode	Magnetic/Portabl
Input voltage	Button batteries
Network mode	Bluetooth
Material	Aluminum/PC
Fire rating	94–v0
Working temperature	–10℃ ~+60℃
Working humidity	≤95％RH，Non–condensing



D1 Knob Dimmer

Intuitive Operation

D1 The knob design can be used as a control panel for a single scene, such as controlling the brightness, color temperature and color of lights in different zones.

Highly customizable

The D1 knob dimmer gives direct access to all the important Casambi lighting control functionalities. The preset buttons of D1 knob dimmer can be configured via the Casambi App.

Color

Dark gray/PC

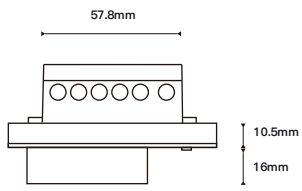
Champagne gold/PC

Snowy white/PC

Space grey/AL

Technical parameter

Product size	86 x 86x 25.4mm (The knob is 16mm)
Bottom shell depth	28mm
Package size	100 x 100 x 60 mm
Weight	0.6 kg
Installation mode	86 Mounting box depth：>50mm



Input voltage	220－240VAC 50－60－Hz
Screen resolution	320 X 320
Network mode	Bluetooth
Screen size	1.35 inch
Material	Aluminum/PC
Fire rating	94－v0
Working temperature	－10℃～+60℃
Working humidity	≤95％RH，Non－condensing
